

DIXION SURGICAL LIGHTS

Dixon highly reliable halogen and LED surgical lights are used for most surgeries.

Consol — and lever-based space-saving models guarantee smooth movement of the lights during operation. It also provides secure fixation of the levers, which makes their usage easy and comfortable with maximum illumination and minimum light intensity loss.

- Easy lamp replacement
- High mobility and ergonomic design
- Maximum shadowless effect even at partial darkening
- Surgical lights are available in mobile version or ceiling-mounted single/double dome models
